PROJECT DESIGN PHASE-I

SOLUTION ARCHITECTURE

Date	20 October 2022
Team ID	PNT2022TMID51528
Project Name	Detecting Parkinson's Disease Using Machine Learning
Maximum Marks	2 Marks

SOLUTION ARCHITECTURE:

Solution architecture is the process of developing solutions basedon predefined processes, guidelines and best practices with the objective that the developed solution fits within the enterprise architecture in terms of information architecture, system portfolios, integration requirements and many more.

It can then be viewed as a combination of roles, processes and documentation that are intendedto address specific business needs, requirements or problems through the design and development of applications and information systems.

SYSTEM ARCHITECTURE FOR DETECTION OF PARKINSON'S DISEASE USING MACHINE LEARNING
